regarding

TECHNICAL VISIT

AT THE CRIVINA-OGREZENI WATER TREATMENT PLANT

On 07.11.2019, the **ASSOCIATION PARTNERSHIP FOR EUROPEAN PROJECTS AND FUNDS (APPFE)** and the **FACULTY OF HYDROTECHNICS** within the **TECHNICAL UNIVERSITY OF CONSTRUCTION OF BUCHAREST (UTCB)** organized, with the support of **APA NOVA BUCHAREST**, a technical visit to the **Crivina - Ogrezeni Water Treatment Plant**.

The technical visit was attended by students of the first and fourth years, specializing in Sanitary Engineering and Protection. Environment within the Faculty of Hydrotechnics - UTCB, they visited the following objectives of the treatment plant:

- water capture, Argeş River;
- sand removers;
- reagent station;
- ozone station, including air conditioning installations;
- Multiflo lamellar decanters;
- Aquazur V rapid sand filters;
- chlorine station;
- sludge drying platforms;
- water plant dispatcher;
- the physical, chemical, biological and microbiological analysis laboratory.

PARTNERSHIP ASSOCIATION FOR EUROPEAN PROJECTS AND FUNDS

On this occasion, professionals from the APA NOVA BUCHAREST company presented to students from the Faculty of Hydrotechnics a series of extremely valuable technical and operational information regarding the functioning of this strategic investment objective for the water supply of the Municipality of Bucharest and neighboring localities.

APPFE welcomed the initiative of the Faculty of Hydrotechnics - UTCB and decided to provide support in its materialization, in order to facilitate the familiarization of future generations of construction engineers, from the early stages of training, with the concrete realities in which representatives of this profession are to carry out their activity.

APPFE will continue to support in the future any similar efforts and initiatives aimed at contributing to the training of specialists in the water supply and sanitation sector.
