THE WATER SECTOR - A STRATEGIC PILLAR OF ROMENVIROTEC

At the 2025 edition, the water sector stole the spotlight at **ROMENVIROTEC**, recording the highest growth in both participation and interest from specialized visitors. This dynamic confirmed our vision: creating an international hub modeled after **IFAT Munich**.

ROMENVIROTEC 2025: the flagship event for the water and environmental sector, backed by government opening and enjoying outstanding public interest!

The event enjoyed an exceptionally high attendance: over 8,800 unique visitors in just three days, while the official opening took place at a high level, with representatives of the Prime Minister's Chancellery, the Ministry of Environment, Waters and Forests, the National Administration "Romanian Waters" and other key institutions.

FOR 2026: A GROWING INTEREST

The 2026 edition will mark the launch of a strategic bilateral partnership between Romania and the Republic of Moldova, supported by the Romanian Environmental Association. We will integrate:

- consultancy and engineering services
- information technology
- cross-border projects

offering exhibitors new opportunities for expansion into the Eastern regional market.

EVENT PROGRAM IN PARTNERSHIP WITH APPFE & FADIDA

In 2025, APPFE and FADIDA organized an intensive program of events dedicated to water management - workshops, round tables, and case studies - bringing together specialists from central authorities, water operators, designers, consultants, builders, suppliers, manufacturers, and local authorities. For the 2026 edition, the collaboration with APPFE and FADIDA is expected to continue, with a broader and more internationalized program supported by strong partnerships with authorities and regional leaders.

APPFE & FADIDA CONFERENCE PROGRAM – GREEN ENERGY EXPO & ROMENVIROTEC 2026

DRAFT PROGRAM APPFE - FADIDA CONFERENCE INTERNATIONAL CONFERENCE “TOWARDS A DIGITAL, SUSTAINABLE AND RESILIENT ROMANIAN WATER AND WASTEWATER SECTOR”

BUCHAREST, ROMEXPO, 3-5 MARCH 2026

CONFERENCE SECTIONS:

1. THEMATIC WORKSHOP “APPLICATIONS, PLATFORMS AND DIGITAL SOLUTIONS FOR MORE EFFICIENT WATER SUPPLY AND SEWERAGE SERVICES”

Key topics:

- Digital applications and platforms, Cybersecurity – BIM
- Smart metering and measuring devices
- Automation and sensor technology
- Energy efficiency
- Applications for consumption optimization
- Intelligent pumping systems for water and wastewater
- Solutions and applications for water loss detection and reduction

2. ROUND TABLE “GOOD GOVERNANCE AND FINANCING OF THE WATER AND WASTEWATER SECTOR – TWO PERMANENT CHALLENGES!”

Key topics:

- Investment financing programs
- Compliance with EU legislation
- Sector leadership

3. THEMATIC WORKSHOP “INTEGRATED STORMWATER MANAGEMENT IN THE NEW CLIMATE CONTEXT – CHALLENGES AND OPPORTUNITIES”

Key topics:

- Integrated approach to stormwater management
- Blue-green infrastructure
- Nature-based solutions
- Quality requirements & pollution control
- Sustainable equipment and solutions

4. THEMATIC WORKSHOP “SUSTAINABLE SOLUTIONS FOR A RESILIENT WATER AND WASTEWATER SECTOR”

Key topics:

- Ecological, circular materials and solutions
- “No-dig” technologies

WATER SECTOR TOPICS AT GREEN ENERGY SECTOR & ROMENVIROTEC 2026!

- Water tanks and water storage solutions
- Water treatment plants and technologies
- Water supply pipelines
- Water filtration systems and equipment
- Sewer pipes
- Smart metering and measuring devices
- Solutions and applications for water loss detection and reduction
- Digital solutions and platforms - Cybersecurity - BIM
- Valves, taps, fittings
- Solutions for water network zoning
- Wastewater treatment plants and technologies
- Solutions for water treatment and wastewater treatment in industries such as: food, chemical & petrochemical, automotive, pharmaceutical, alcoholic and soft drinks, dairy, etc.
- High-performance solutions and equipment for the irrigation sector
- Sludge treatment
- Energy efficiency & use of renewable energies
- Solutions and equipment for stormwater collection/storage/reuse/gradual soil infiltration
- Pumps and pumping systems for water and wastewater
- Odor control technologies
- Process automation
- Research and innovation

What's New in 2026 - What's Next at ROMENVIROTEC?

Advantages	Details
Extended exhibition space	More space for stands, demos, and B2B sessions.
Comprehensive and complete thematic coverage	Complete solutions from source to recipient: water treatment and distribution, sewerage, pumping, wastewater treatment, sludge management, odor control, energy efficiency, digitalization. In addition: solutions for industry & applications, and equipment for the irrigation sector!
Refined audience	Professionals from water operators, designers, consultants, builders, suppliers, manufacturers, central authorities, intercommunity development associations, and local public authorities.
Access to funding	Discussions on European funding and green policies.
Regional partnership	Access in the Republic of Moldova, cross-border opportunities.

PARTICIPATION OFFER

**GREEN ENERGY
EXPO & ROMENVIROTEC**

The rates for the 2026 edition remain unchanged from the 2025 edition - we maintain transparency and budget predictability. Request your personalized offer now and secure your participation in the most important regional event dedicated to water technologies.

- 💧 Participation fee: 200 EURO/company
- 💧 Space rental:
 - ◆ from 108 EURO/sqm (row stand)
 - ◆ up to 123 EURO/sqm (island stand)
- 💧 Stand construction: 30 EURO/sqm (standard stand)
- 💧 Discounts for space rental:
 - ◆ 5% for areas over 50 sqm
 - ◆ 10% for areas over 100 sqm
